Hello stranger.

You are about to explore a zestful story about Cem Özsezgin.

To take a long story short he is a product designer from Turkey.
Currently, he works for Webex Events. He formerly worked for iyzico, Userspots & 1MM Design Agency.

He is in love with micro-interactions and passioned with design systems those live.

His first and flawless victory!

On one of the baking hot days of 1990, he finished the race to existence in 1st place among 5 million opponents. He opened his eyes as the second child of Özsezgin family.

20 July 1990

First imprints on surroundings

By touching and feeling everything beneath, an awareness grew inside of him. That would be the reason for his unbounded curiosity.

The motive of a left handed person

14 August 1990

Ready to take his first steps

Once he got a move on walking, he never stopped. On this road, he became associated and with many people and places. During the lonesome walks, he started to build his own aspect of life.
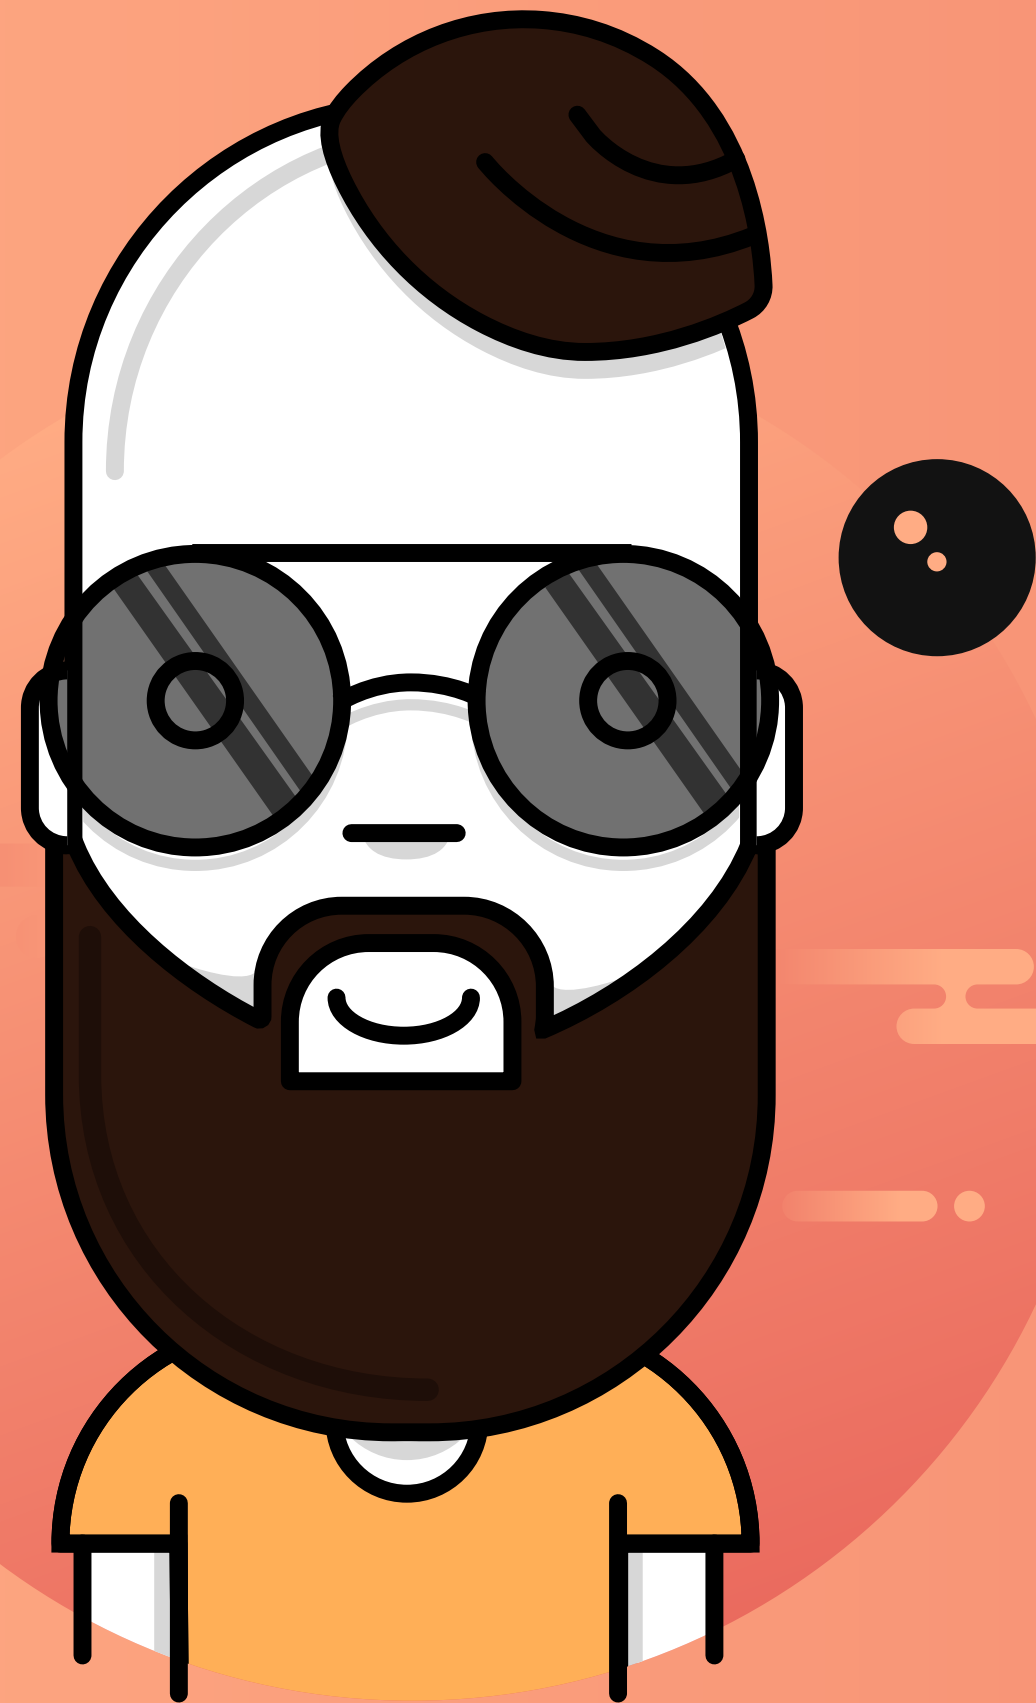

These are actually Cem's footprints

Really cool story bro but

Who the f😮ck is
Cem Özsezgin

Hey, I am Cem Özsezgin

At the age of 16, by chance and many great consequences, I have met an astonishing software called Photoshop. Combining my coding skills with this approach, I've begun designing logos, posters, websites for fun and my friends. After a while, he discovered that he could get paid for this.

On this journey, each day I've upgraded my skills by showing my hard work on projects of my own and companies I've associated with. By doing this I've found my true intention; Product Design.

I led design teams full of awesome folks. I have worked on hundreds of projects for companies like; iyzico, Özdilek, ING Bank, D&R, QNB, Network, Pegasus, Kamilkoç, Koç Group, Kahve Dünyasi, Garanti Bank, Albaraka, Sabancı University, Hepsiburada and much more.

Ismail Cem Özsezgin
Product Designer

I've yielded my pen!

As of today, I design products and create design systems for lots of products. I especially had chance to work with fintech companies. I always try to keep up with the ever spinning world of product design to achieve an understanding of user research and data centered design.

Don't judge, just pour me a beer!

Kidding of course, but a coffee is going to suffice. I think it would be very nice to be acquainted with you and your company.
Many coffees will be poured by our conversation to know each other better and building new ideas.
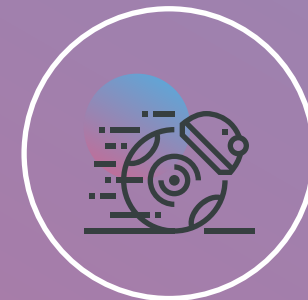

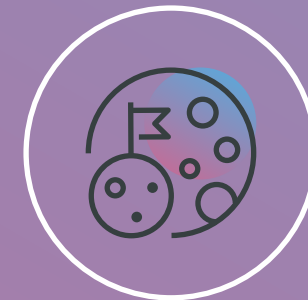

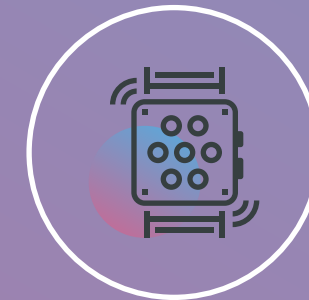

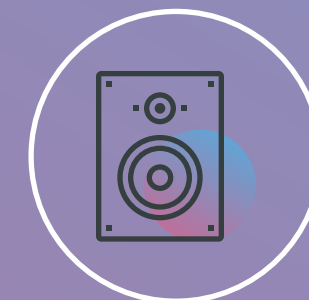

Comics   Bikes   Foods   Basketball   Tech   Sci-Fi   Space   Photo   Watches   Audio   Games   Coffee
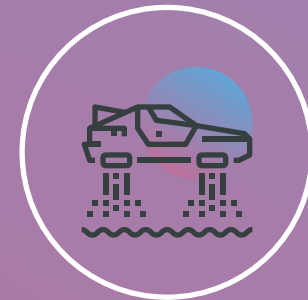

Ok, ok i got it but,

What the h😬ll is
he doing

Take a look at my portfolio
